

Sidecar (1:1)

stdio, same machine

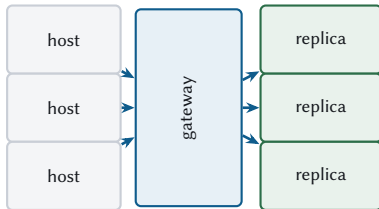

*no network at all
process boundary is the
isolation boundary*

*cold start on every spawn
(44.7 ms measured)*

Gateway (N:1)

Streamable HTTP

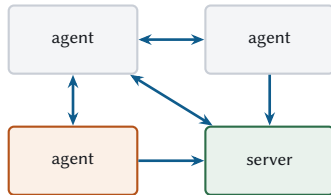

*plain round robin
no sticky sessions
no session store*

*routes on Mcp-Method
and Mcp-Name, without
parsing the body*

Mesh (N:M)

agents on both sides

*an agent is a host on one
side and a server on the other*

*needs depth limits and
budget enforcement
(§ ch. 14)*
